

Portfolio Planning and Management

vhsconsulting.co.uk

We identify, prioritise and manage programs based upon their alignment and contribution to the organization's objectives, providing the visibility and insights required to enable senior leadership to make more informed decisions.

Our PMO service offering includes setting up and running a Portfolio Management Office. The PMO is a permanent support structure for all business change within an organisation. We help in the identification, prioritisation and structuring of your ideas and projects and ensure they align to the organisation's strategic objectives. We also carry out strategic assessments of potential projects and develop complex business cases from ideation to a robust case that informs senior leadership of its viability.

Align your Business and Digital Strategy

vhsconsulting.co.uk

Constructing a blueprint of your business. Providing you a total concept of your business structure by aligning to your business strategy and optimising your business processes, functions and roles.

Our Business Architecture solution will define and align your business strategy with the organization's mission, as well as design and optimize your business model and value proposition with market needs. A blueprint will function as a map for communicating, constructing, growing, repairing and transforming your business. The business architecture makes the basic structure and function of the business visible and enables executives, managers and technologists to use a common language for planning and operating the business.
